

## HOW TO BYPASS UNIT

Depending on the age of your unit the processes may vary in regards to bypassing your system.

**\*\*Always bypass your system whenever you have work performed on your well.**

### 3-valve bypass

1. Turn both blue valves clockwise (one on left and one on right)
2. Turn red valve (center) counter clockwise
3. This will turn water off to and from unit while still providing water to the house.

### Lever Bypass

This will be the same basic set-up as the 3-valve bypass; it will only be in different configurations.

1. Turn red handled levers to off position.
2. Turn blue valve counter clockwise.

### Kinetico Bypass

1. There is a viewable window on right side of disc to indicate position.
2. Turn handle to:  
Green-soft water  
Yellow-bypass  
Red- no water
